A3Bots Technologies Private Limited July 2021 - October 2022, Pondicherry
- Developed Web and Mobile Applications with dierent eicient features with Angular and Ionic.
- Worked over the reactive forms by exploring many NPMs like angular-web socket and successfully developed various features for the required areas of web applications development. Debugging, Provide Technical Support for A3Bots - NMC Application. Experience with Firebase Cloud Messaging (FCM-Firebase) for developing a Push-Notification feature with IONIC-Cordova and building that application with Android Studio with project ownership.

Assistant Engineer
DOWEL ERECTORS PRIVATE LIMITED August 2019 - December 2020, Singrauli
- Boiler Maintenance - subsequent readings, and maintaining Dashboards. Tracking the samples of valves and tubes and later on, checking out the quantity and quality of coal storage.
- Maintaining insights into the machinery products through Excel sheets (Data Maintenance, Ingestion, and Data Cleaning). Data Collection and Ingestion by SQL server for dierent projects related to the products and employees. Data Cleaning, Exploration, creating KPIs., and Visualization over Tableau.

EDUCATION

Bachelor of Technology - B-Tech., Mechanical Engineering
Vellore Institute of Technology • 7.0 • India-Chennai • July 2020

PROJECTS

Angular - Weather Forecasting web Application- Namaste Weather
A3Bots Technologies • May 2021 - June 2021
- Namaste Weather is a weather forecast app built using Angular 11/12, it provides a quick and easy search and displays the weather forecast of the country and city by capturing the latitudes and longitudes with the help of location navigators.

Sales Insights Data Analysis Project using Tableau and SQL.
Upwork • January 2021 - February 2021
- I started this project with the help of AimsGrid, I get to know about the Purposes, Stakeholders, End Results, and Success Criteria. Aer this, Sales records were stored in the MySQL database. This database had all sales transactions, customers, products, and market information. Implemented MySQL queries using SELECT, FROM, WHERE, GROUP BY, HAVING, and ORDER BY commands to access the Databases & Tables

Data Visualization- Insights of FDI Data for 2000-2018
June 2020 - July 2020
Associated with Upwork

Capstone Project- Research over Magnesium Composites for various Biomedical Purposes
December 2018 - May 2019
Associated with Vellore Institute of Technology

SKILLS

Frameworks: Angular 2+, Node.js, React.js, Angular-Testing- Karma & Jasmine, Docker(For Deployment), Ionic (For Mobile Apps), Tableau, Android Studio.

Databases: MySQL, MongoDB, MS-Excel.

Type your text

Dev Tools: Visual Studio Code, GitHub, Git, Git Extension, Karma, Jasmine.

So Skills: Adaptability, Communication, Problem-Solving, Time Management, Leadership, Empathy, and Continuous Learning.

Languages: JavaScript, Typescript, HTML5, CSS3

Others: Data Manipulation, RCAs, Debugging, PRDs, Network Troubleshooting, Atlassian JIRA, Excel, Power-BI and UI-Testing, Project Ownership, L-1/L-2/L-3 Support.

CERTIFICATIONS

Postman Student Expert
